

VitalSync

Privacy Policy

Effective Date: June 1, 2025 | Version 1.0
Developed by sohiaking | Android Application

1. Introduction

VitalSync ('we', 'our', or 'us') is committed to protecting your personal information and your right to privacy. This Privacy Policy explains how we collect, use, disclose, and safeguard your information when you use our Android mobile application. Please read this policy carefully. If you disagree with its terms, please discontinue use of the application.

2. Information We Collect

2.1 Information You Provide Directly

- Health metrics: weight, height, age, fitness goals
- Meal and nutrition logs entered manually
- Workout sessions, exercise names, sets and reps
- Sleep logs including bedtime and wake time
- Emergency contact names and phone numbers

2.2 Information Collected Automatically

- Step count data from the device hardware pedometer sensor
- GPS location data (only when Walk Tracker or SOS is active)
- Accelerometer readings used exclusively for fall detection
- Device identifier for crash reporting (anonymized)

2.3 Information We Do NOT Collect

We do not collect your name, email address, passwords, payment information, browsing history, contacts list, or any data unrelated to health and fitness tracking. VitalSync operates fully offline — no account registration is required.

3. How We Use Your Information

Purpose	Data Used	Storage
Display daily step progress	Step count, distance, kcal	Local only
Walk route visualization	GPS coordinates	Local only
Fall detection & SOS alert	Accelerometer, GPS	Not stored

Sleep quality analysis	Bedtime, wake time	Local only
BMI calculation	Weight, height	Local only
Nutrition tracking	Meal logs, macros	Local only
Emergency contact alerts	Phone numbers, GPS	Local only

4. Data Storage & Security

All data collected by VitalSync is stored exclusively on your device using Android's Room (SQLite) database and SharedPreferences. Sensitive items such as emergency contacts are stored using Android's EncryptedSharedPreferences backed by the Keystore system. We do not operate servers, cloud backends, or remote databases. Your data never leaves your device under normal operation.

Biometric authentication (fingerprint or face unlock) may optionally be enabled to restrict access to health data within the app. This authentication is handled entirely by Android's BiometricPrompt API and biometric data is never accessible to VitalSync.

5. Location Data

VitalSync requests ACCESS_FINE_LOCATION permission for two specific features only:

- Walk Tracker: GPS coordinates are used to render your walking route on a map. Route data is stored locally and is never transmitted externally.
- SOS Emergency: Upon fall detection or manual SOS activation, your current GPS coordinates are shared via SMS or call with your designated emergency contacts only. This data is not stored by VitalSync.

Location access is never active in the background except during an active Walk Tracker session or an active SOS emergency.

6. Third-Party Services

VitalSync integrates Google Maps SDK solely for walk route display. Google's own privacy policy governs data processed by the Maps SDK. No other third-party analytics, advertising, or data-collection SDKs are included in this application.

7. Children's Privacy

VitalSync is not directed at children under the age of 13. We do not knowingly collect personal information from children. If you are a parent or guardian and believe your child has provided us with personal information, please contact us and we will take steps to delete such information.

8. Your Rights & Data Control

Because all data is stored locally on your device, you retain full control:

- Delete all app data via Android Settings → Apps → VitalSync → Clear Data
- Revoke any permission at any time via Android Settings → Apps → VitalSync → Permissions
- Uninstall the app to permanently remove all associated data

9. Changes to This Policy

We may update this Privacy Policy from time to time. Any changes will be reflected by an updated Effective Date at the top of this document and a version number increment. Continued use of the application after changes constitutes acceptance of the revised policy.

10. Contact Us
